		Rat- ing
7833	Malignant melanoma: Rate as scars (DC's 7801, 7802, 7803, 7804, or 7805), disfigurement of the head, face, or neck (DC 7800), or impairment of function (under the appropriate body system). Note: If a skin malignancy requires therapy that is comparable to that used for systemic malignancies, i.e., systemic chemotherapy, X-ray therapy more extensive than to the skin, or surgery more extensive than wide local excision, a 100-percent evaluation will be assigned from the date of onset of treatment, and will continue, with a mandatory VA examination six months following the completion of such antineoplastic treatment, and any change in evaluation based upon that or any subsequent examination will be subject to the provisions of §3.105(e). If there has been no local recurrence or metastasis, evaluation will then be made on residuals. If treatment is confined to the skin, the provisions for a 100-percent evaluation do not apply.

THE ENDOCRINE SYSTEM

$\$\,4.119$ Schedule of ratings—endocrine system.

	Rat- ing
7900 Hyperthyroidism	
Thyroid enlargement, tachycardia (more than 100 beats per minute), eye involvement, muscular weakness, loss of weight, and sympathetic nervous system, cardiovascular, or	
astrointestinal symptoms	100
Emotional instability, tachycardia, fatigability, and increased pulse pressure or blood pressure Tachycardia, tremor, and increased pulse pres-	60
sure or blood pressure	30
Tachycardia, which may be intermittent, and trem- or, or; continuous medication required for con-	
trol	10
NOTE (1): If disease of the heart is the predominant finding, evaluate as hyperthyroid heart disease (DC 7008) if doing so would result in a higher evaluation than using the criteria above.	
NOTE (2): If ophthalmopathy is the sole finding, evaluate as field vision, impairment of (DC 6080); diplopia (DC 6090); or impairment of central visual acuity (DC 6061–6079).	
7901 Thyroid gland, toxic adenoma of	
Thyroid enlargement, tachycardia (more than 100 beats per minute), eye involvement, muscular weakness, loss of weight, and sympathetic	
nervous system, cardiovascular, or gastro- intestinal symptoms	100
Emotional instability, tachycardia, fatigability, and increased pulse pressure or blood pressure	60
Tachycardia, tremor, and increased pulse pres-	
sure or blood pressure	30

9	
	Tachycardia, which may be intermittent, and trem-
10	or, or; continuous medication required for con- trol
10	NOTE (1): If disease of the heart is the predomi-
	nant finding, evaluate as hyperthyroid heart dis-
	ease (DC 7008) if doing so would result in a
	higher evaluation than using the criteria above.
	NOTE (2): If ophthalmopathy is the sole finding, evaluate as field vision, impairment of (DC
	6080); diplopia (DC 6090); or impairment of
	central visual acuity (DC 6061–6079).
00	7902 Thyroid gland, nontoxic adenoma of
20 0	With disfigurement of the head or neck
U	Without disfigurement of the head or neck NOTE: If there are symptoms due to pressure on
	adjacent organs such as the trachea, larynx, or
	esophagus, evaluate under the diagnostic code
	for disability of that organ, if doing so would re-
	sult in a higher evaluation than using this diag-
	nostic code.
	7903 Hypothyroidism
	Cold intolerance, muscular weakness, cardio-
	vascular involvement, mental disturbance (dementia, slowing of thought, depression),
	mentia, slowing of thought, depression),
100	bradycardia (less than 60 beats per minute),
100	and sleepiness Muscular weakness, mental disturbance, and
60	weight gain
30	Fatigability, constipation, and mental sluggishness
	Fatigability, or; continuous medication required for
10	control
	7904 Hyperparathyroidism
	Generalized decalcification of bones, kidney
	stones, gastrointestinal symptoms (nausea,
100	vomiting, anorexia, constipation, weight loss, or
60	peptic ulcer), and weakness
10	Continuous medication required for control
	NOTE: Following surgery or treatment, evaluate as
	digestive, skeletal, renal, or cardiovascular re-
	siduals or as endocrine dysfunction.
	7905 Hypoparathyroidism
	Marked neuromuscular excitability (such as con-
	vulsions, muscular spasms (tetany), or laryn-
	geal stridor) plus either cataract or evidence of increased intracranial pressure (such as
100	
100	papilledema)
	paresthesias (of arms, legs, or circumoral area)
	plus either cataract or evidence of increased
60	intracranial pressure
10	Continuous medication required for control
	7907 Cushing's syndrome
	As active, progressive disease including loss of
	muscle strength, areas of osteoporosis, hyper-
100	tension, weakness, and enlargement of pituitary
100	or adrenal gland
60	Loss of muscle strength and enlargement of pituitary or adrenal gland
00	With striae, obesity, moon face, glucose intoler-
30	ance, and vascular fragility
	ance, and vascular fragility
	siduals of adrenal insufficiency or cardio-
	siduals of adrenal insufficiency or cardio- vascular, psychiatric, skin, or skeletal complica-
	tions under appropriate diagnostic code.
	7908 Acromegaly
	Evidence of increased intracranial pressure (such
	as visual field defect), arthropathy, glucose in-
100	tolerance, and either hypertension or cardio- megaly
.00	Arthropathy, glucose intolerance, and hyper-
60	tension

§4.120

	Rat- ing		Rat-
Enlargement of acral parts or overgrowth of long bones, and enlarged sella turcica	30 100 60 40 20 60 40	NoTE (1): Evaluate compensable complications of diabetes separately unless they are part of the criteria used to support a 100 percent evaluation. Noncompensable complications are considered part of the diabetic process under diagnostic code 7913. NOTE (2): When diabetes mellitus has been conclusively diagnosed, do not request a glucose tolerance test solely for rating purposes. 7914 Neoplasm, malignant, any specified part of the endocrine system NOTE: A rating of 100 percent shall continue beyond the cessation of any surgical, X-ray, antineoplastic chemotherapy or other therapeutic procedure. Six months after discontinuance of such treatment, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter. If there has been no local recurrence or metastasis, rate on residu-	100
required for control	20	als. 7915 Neoplasm, benign, any specified part of the endocrine system rate as residuals of endocrine dysfunction. 7916 Hyperpituitarism (prolactin secreting pituitary dysfunction) 7917 Hyperaldosteronism (benign or malignant) 7918 Pheochromocytoma (benign or malignant) NOTE: Evaluate diagnostic codes 7916, 7917, and 7918 as malignant or benign neoplasm as appropriate. 7919 C-cell hyperplasia of the thyroid NOTE: A rating of 100 percent shall continue beyond the cessation of any surgical, X-ray, antineoplastic chemotherapy or other therapeutic procedure. Six months after discontinuance of such treatment, the appropriate disability rating shall be determined by mandatory VA examination. Any change in evaluation based upon that or any subsequent examination shall be subject to the provisions of §3.105(e) of this chapter. If there has been no local recurrence or metastasis, rate on residuals.	100
7912 Pluriglandular syndrome Evaluate according to major manifestations. 7913 Diabetes mellitus		[61 FR 20446, May 7, 1996]	

7913 Diabetes mellitus

Requiring more than one daily injection of insulin, restricted diet, and regulation of activities (avoidance of strenuous occupational and recreational activities) with episodes of ketoacidosis or hypoglycemic reactions requiring at least three hospitalizations per year or weekly visits to a diabetic care provider, plus either progressive loss of weight and strength or complications that would be compensable if separately evaluated ...

Requiring insulin, restricted diet, and regulation of activities with episodes of ketoacidosis or hypoglycemic reactions requiring one or two hospitalizations per year or twice a month visits to a diabetic care provider, plus complications that would not be compensable if separately evaluated ..

Requiring insulin, restricted diet, and regulation of

Requiring insulin and restricted diet, or; oral hypoglycemic agent and restricted diet Manageable by restricted diet only

[61 FR 20446, May 7, 1996]

NEUROLOGICAL CONDITIONS AND CONVULSIVE DISORDERS

§ 4.120 Evaluations by comparison.

Disability in this field is ordinarily to be rated in proportion to the impairment of motor, sensory or mental function. Consider especially psychotic manifestations, complete or partial loss of use of one or more extremities, speech disturbances, impairment of vision, disturbances of gait, tremors, visceral manifestations, injury to the skull, etc. In rating disability from the conditions in the preceding sentence refer to the appropriate schedule. In rating peripheral nerve injuries and their residuals, attention should be
